Universal Wiring Harness Kit

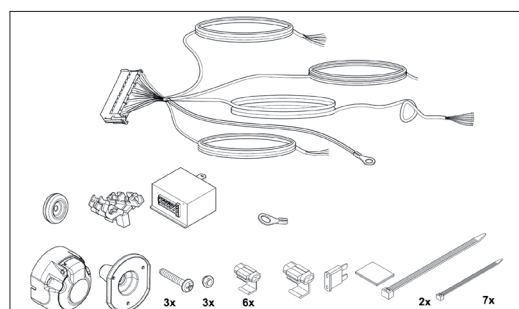

The new universal E-Kit by ERICH JAEGER serves as an interface between towing vehicle and trailer. It supports multiplexed systems (multiple functions transmit over one line) / PWM (pulse-width modulation). The E-Kit can be used for nearly all cars. It can be used with LEDs and bulbs.

The universal E-Kit is suitable for cars in the following countries:

- | | | | |
|------------------|-------------|---------------|---------------|
| • Bulgaria | • France | • Netherlands | • Slovakia |
| • Croatia | • Greece | • Norway | • Slovenia |
| • Czech Republic | • Hungary | • Poland | • Spain |
| • Denmark | • Italy | • Portugal | • Sweden |
| • Estonia | • Latvia | • Romania | • Switzerland |
| • Finland | • Lithuania | • Russia | • Turkey |

Model Types

7-pin 12 V (ISO) Universal Wiring Harness Kit

Artikel-Nr.
Article-no.
735315

Features

- E-Kit can be used for nearly all cars
- Can be used with LED and blulbs
- Seperates the two light functions reliable (BL /TL or RFL /TL)
- Supports multiplex systems / PWM (pulse-width modulation)
- Supports complete park light compatibility
- Easy to install
- Wide operating voltage range 9 V to 15 V
- Wide operating temperature range -40°C to +85°C
- Low quiescent current < 3 mA
- Supports 4 x 21 W on break light and 2 x 21 W on all other light outputs
- Short circuit protected outputs
- Resistance against changed battery clamps
- Electromagnetical interference protection ECE – R 10 Rev. 4
- Protection class IP50
- Socket with screw terminals
