# **SERIES 8819**

Push pull connector for rough environments

Watertight up to 300 m water depth

Marine - Oceano products - Military

## Series 8819

The outstanding characteristic of the series 8819 is the pressure density also in unmated condition up to 300 m water depth. The combination of the rigid plastic and flexible elastomere materials guarantees a long term function in rough environments.

The series 8819 is easily assembled as no special tools or potting compounds are required to seal the connector. They are available with the standard contact design of 4 or 7 contacts.

#### Classes and shell materials

The series 8819 consists of different materials. The essential part of the insulator is GFK, the backshells are available in EPDM or NBR. This connector series can be submerged up to 300 m water depth mated and unmated.

Layouts Shellsize	Contacts AWG 8	Contacts AWG 12
1	(1) (4) (2) (3)	(6) (6) (8) (9) (9) (9)
Number of contacts	4	7
I max. connector	4 x 32 A	7 X 13 A
I max. contact	43 A	23 A
U max.	750 V~	750 V~
P max.	30 bar	30 bar
Ø cable	9,5 – 20,5 mm	9,5 – 20,5 mm
Conductor	1,5 - 6 mm²	1,5 - 4 mm²

# **Examples of applications**

- water treatment plants
- tunneling lighting and signal systems
- life boats
- offshore equipment
- ships and other water vehicles
- buoys and floating lights
- utility vehicles
- industrial applications
- · railway technology

## Standard designs and references
